## Geology Today

## Index 2002

Abu Qir Bay (Egypt), drowned cities 43
Achanarass Quarry SSSI, Caithness, stone for slates or flags 124
*Actinodiscus wrighti* 154
aheylite *see* Turquoise (Minerals explained)
Ailsa Craig, source of curling stones 209
Airy's Bridge Group 168
Akilia (Greenland), banded-iron formation not a BIF at all 212
alabaster, commercial, Watchet 238
Aldrin, Buzz, and that moon walk 205
Algeria, non-emergency planning 164
*Allonnia phrixothrix* 61
American Association for the Advancement of Science (AAAS) meeting, reports from 83
American Geophysical Union (AGU), scientific papers published on the Internet as cited version 124–5
Ancaster Gap 17
  early route for River Trent to Wash Gap 22
ANDREWS, P., New Zealand
  collapses all round 50–1
  new fossils and the FRF 130
animal bones, in calcrete bands, Rhone Valley 62
  summary of the deposit published 62
Antarctica
  explosion in 127
  Larsen B Ice Shelf collapse 85
Antwerp Mineral Club (MKA) *see* moon rock for sale
*Anulocrinus thraivensis* 152
aragonite, in shells, frequently replaced 228, *228*
Aran Isles, cliffs of 3back cover
*Arbacia* 231
arctic desert, Spitzbergen 208
arfvedsonite, riebeckitic, Ailsa Craig 209
arsenical pyrites *see* Arsenopyrite (Minerals explained)
arsenolite, in association with arsenopyrite 72
Arsenopyrite Group 72
Arsenopyrite (Minerals explained) 72–5
  alteration 73
  chemistry 72–3
  common mineral found world-wide 74–5
  curation 75
  distinguishing features 73
  environment 73–4
    in Devon Granite metamorphic aureoles 74
    frequently associated with other high-temperature minerals 73
    in greisen-sulphide veins and skarns 73–4
    in hydrothermal deposits 73
    important association with gold 74
    present in Black Band Ironstones 74
  etymology 72
  poisonous 72, 75
  structure 72, 73
    derivative from marcasite structural type 73
  uses 75
    in gold exploration 75
    as insecticide and vermin killer 75
Arthropleurid myriapods (Fossils explained) 35–7
  *Arthropleura* described 35–6
  body fossils
    *Arthropleura sensu stricto* 35
    *Eothropleura* 35
  classification and relationships uncertain 35
  life in the Coal Measure delta environment 36
  near-complete, found in non-marine deposits 36
  occurs in association with plant fragments 36
  palaeoecology and behaviour 36–7
  possible fossil trackways 36, *36*
  reconstructions
    *Arthropleura armata* 35, *35*
    left leg, *Arthropleura* 36
  respiration 36
  trace fossils 36, 36–7
    *Diplichnites* 35
arthropods, even older 214
  body-fossils, earliest known assemblages, Silurian 214
  trace fossils
    latest reported trackways 214, *214*
    mid-Ordovician trackways 214
asteroids
  2002 MN 162
  2002 NT7, on a collision course? 162
  *Cruithne* 204
  giant 240
asteroids and ophiuroids, Lady Burn Starfish Beds 154, 155
*Aulechinus grayae* 154
Australia
  before East Gondwana 135–6, *136*
  largest dinosaur found in 3
  late Quaternary death of all land mammals, possible mechanisms 87–8
  South, Edeowie glass and a missing crater 89
Australia Telescope (radio), protoplanetary discs (proplyds) seen 8
Automobile Association, settled copyright action over use of OS maps 171
awards/prizes
  Crafoord Prize, to Dan McKenzie, Cambridge University 44
  David Wilson, Pinnacle Award of the Dry Stone Walling Association 133
  John A. Orcutt, president-elect of the AGU 44
  Richard Monasterky and Diane Tennant 44
  to David Thompson and Peter Smith by the Geological Society 49
Azores Fracture Zone, and the Madeira hotspot trail 26, *26*

Bain, River 17, *18*
Balderton Sand and Gravel (formerly Beeston Terrace deposit) *18*, *19*
  aggraded under periglacial conditions 20
  much removed by later erosion 20
  Newark, encircles two of the Grafloe Hills 20
Ballagan Formation, holotype of *Pederpes finneyae* 216, *216*
Ballycarty passage tomb, County Kerry
  archaeological finds 141
    grave goods 141
  discovery 139
  funereal fossil finds predate earliest examples in British Isles 142–3
  geological and palaeontological finds 141–2
    Carboniferous fossils 141, *141*, 142, *142*
    cobbles, nodules and limestone fragments 141–2
  geological setting 139–40
  geology of constructed of Waulsortian Limestone 140
  three phases of building 140–1, *140*
banded-iron formations (BIFs)
  adsorption of phosphorus into 215
  *see also* Isua crustal belt
Bangkok, a sinking city 99–100
  increase in flooding across the city 100, *100*
  record-holder for rate of subsidence 99–100
  water abstraction from shallow sand aquifers 100
Banks, Sir Joseph, discoverer of Fingal's Cave 126
Barbados, Miocene Antillean crinoids, beds part of an accretionary prism 108
Barberton sequence 24–5
  Barberton spherule beds 24
BARKER, M. *see* RADLEY, J.
Barnetby Gap, history still to be unravelled *18*, 19
basalts/dolerites, Carboniferous 240
Bath Stone 51
Bath stone, literally! 71
bauxite, Jamaica, hypotheses explaining origin and occurrence 150, *150*
beach replenishment, Miami 84
Beijing, recent inundation by sea, fossils prove it 177
belemnites, acid-etched, in fossil vomit 45
BELL, C.M., Did elephants hang from trees? – the giant sloths of South America 63–6
Binnie Sandstone 134
biodegradation, by hard-rock microbes 89
biostratinomy 226
  of individual organisms 226–7, *227*
biotite 71
Biscathorpe Gravels *19*, *20*
  overlain by glacial till 17
Bjerrum/Canfield hypothesis, right or wrong? 215
Blake Ridge Depression
  no free methane in depression sediments 213–14
  wave-like sediment forms 213, *213*
    created pathways allowing methane to escape 214
bobkingite (new mineral name) 199
body fossils 226
  arthropod, earliest 214
Book reviews 37–40, 76–8, 115–20, 158–60, 232–7
bothriocidaroids 153, 154, 155
boudinage, Porsanger Fjord, Norway 130–1
Boulby potash mine, check for spalling slabs in tunnel roofs 218
bouncing boulder causes derailment, N. Ireland 129–30
  debris movement 129, *129*
  fatal for nesting fulmar 129–30
bourgueticrinids *109*
Bowden shell bed 229–30, *231*
  chitons present 230
  death assemblage suggested 230
  echinoids 230, *231*
  palaeoenvironmental interpretations, some problems 229, *230*
  turbiditic in origin 230
  well-preserved benthic molluscs 229–30
*Brachythris pinguis* 141
Branch Line 78–80, 200, 238–40
Briefing 3–7, 42–8, 82–7, 122–8, 162–5, 202–7
British Geological Society, *The Pennines and Adjacent Areas* 166–7
British Isles
  occurrences of turquoise 112, 113
  terranes of the Caledonian and Variscan orogens 50
  vertical land movements 59–60
    absolute gravity monitored near tidal gauges 59
British Library, stone circle for with Gormley engraving 84
BROOK, A., Gideon Mantell's inaugural publication 223–5
Burgess Shale fauna 151
burial, preserves complex skeletons 226–7
*Burren Karst*, D. Drew 171
BUTCHER, N.E., Hutton Memorial Garden, Edinburgh 52–3
Bytham buried valley and deposits 22

Caithness Flags 124
  banding in akin to varves 131–2
  competing with 'York Stone' 131
  laid down in freshwater lake subject to drying out 131
  upright slab, Austen Friars, with 'Still Point' message 132
  used by monumental masons 132
Caithness Fossil Group, brief guide to fossil fish of Caithness 124
Calaveras Fault, and locked-segment hypothesis 58
Calcethorpe Till 17, *19*, *20*
calcichordates, Lady Burn Starfish Beds 155, *156*
calcite
  high-magnesium (HMC) 228
  low-magnesium (LMC) 228
  for lunch? 128
calendars, Julian and Gregorian 204–5
  confusion of Lord Chesterfield 205
*Campanile* 147
Canada
  geological hazards 207
  gneiss monolith installed, University of Waterloo, Ontario 14–15
cap carbonates, the hydrate solution 58
carbon dioxide
  atmospheric
    linked to Earth's temperature 90–1
    relationship may not be as simple as supposed 90–1
  degassing of, Mammoth Mountain 42
Carboniferous Limestone, Mendips 240
Carboniferous people, maybe?! 87

def. = definition; let. = letter; figures and tables in italics

Caribbean, unravelling the evolution of stalked crinoids 107–10
CARNEY, J., The Winter Olympics: going for gold 209
Carpathian thrust belt, and the Wieliczka salt deposits 182, *182*
Castleisland Limestone 140
caves
  a feature of Jamaican karst landscape 146–8, *146*, *147*, *148*
    Red Hills Road Cave 147–8, *148*
    Wait-a-Bit Cave, archetypal cave meander 146–7, *147*
Cetacea
  closely related to hoofed mammal group 88
  land-to-sea route confirmed 88
chalcosiderite (turquoise) 111, 112
Chalk, phosphatic 180
*Chancelloria* 60
Chapelton Formation 146
Chengjiang biota 60, *61*
China
  Beijing at sea recently 177
  death of Yellow Emperor Huangdi due to meteorite 127
  south-west, Chengjiang biota 60, *61*
  southern, sulphur release by extra terrestrial impact suggested 92
china clay deposits 71
cinnabar (Minerals explained) 195–9
  acquisition 198
  alteration of 197
    metacinnabar, a hypogene mineral 197
    metastable 197
  chemistry 195–6
    chemico-structural types 196
    containing selenium 195
    metacinnabar 185
    natural affinity for sphalerite 195–6
  curation 199
  distinguishing features 197
  environment 197–8
    Almadén deposit, Spain 197–8
    associated with hydrocarbon deposits, Karpinsky Lineament 197
    occur in mercury belts 197
    occurrence as a detrital mineral
    often related to hot spring activity 198
    relationship with volcanic/igneous activity and associated processes 197
  etymology 195
    derivation of mercury name and chemical symbol 195
  old references to 195
  structure 196
    Airy's spirals 196
    in 'froth veins' 196
    of metacinnabar 196
  toxicity 199
  uses of 198–9
    in amalgam 198
    as a colouring agent 198
    uses of mercury compounds 199
cities
  sinking 95–100
    Bangkok 99–100
    London 96–7
    Mexico City 98–9
    Santa Clara 95–6
    Shanghai 99
    Venice 97–8
clay, compaction causing subsidence 95, 96, 97
  depends on age and type of clay 98–9
clay minerals 70
  ability to absorb or release fluids 67
  in accretionary prisms, compressed, hardened and recrystallized *68*
  compositions in deep-sea muds 69
  formation of 67
  formed by hydrothermal alteration 71
  key constituents of mud 67
  typical, crystal structure of *68*, 69, 69
*Cnemidactis grivanensis* 154
coal, Eocene, mined in Spitzbergen 208
coal gasification, underground coal gasification (UCG), pros and cons 125
coastal management, Environmental Agency's 'managed retreat' policy 4
coastlines, on Royal Mail stamps 45–6
cobalt, in the arsenopyrite lattice 72
coeruleolactite *see* Turquoise (Minerals explained)
Cola on the rocks, irresponsible 205, *205*
collectors, and fossils 203
COLSTON, A., Wicken Fen 174
comets, Tempel 1, attempt to see inside 9, 9
Comley Limestone 60
Community 43–6, 122–5, 206–7
compression, horizontal 217
CONNOLLY, M. *see* WYSE JACKSON, P.N. and CONNOLLY, M.
conodonts, problematica and the Chengjiang biota 60, *61*
Coprolite mining in England 178–81
  composition 179
  coprolites described 178, *178*
  derivation of 'coprolite' 178
  distribution 179–80
    Cretaceous strata of Cambridgeshire 179
    hard grounds, local phosphate concentrations 180
    outcrops of Gault and Greensand 179–80, *179*
  extraction 180–1
    by open-cast methods 180–1, *180*
    communities focus of secondary trades 181
  formation and concentration of 178
  more profitable than agriculture 181
  utilization 181
    superphosphate and today's chemical fertilizer industry 181
Cornwall, crystallized turquoise deposits *112*, 113
Correspondence 15–16
*Cothurnocystis elizae* 155, *156*
creationism 85–6
  Ohio, changed to 'intelligent design' 125–6
  taught in Britain 82–3
Cretaceous Period, end of, expansion of mammals and birds 63
crinoid stems 142
crinoids
  Lady Burn Starfish Beds *152*, 155
  stalked, unravelling the evolution of in the Caribbean
    (squeezing the fossil record) 107–10
    interpretation of fossil echinoderms 108
    the Miocene Antillean crinoids 108–9
    most specimens preserved as ossicles 109, *109*
    post-Palaeozoic, occur in deeper water sedimentary rocks 108
    reduced abundance and diversity after end-Permian 108
    significance of the discoveries 109–10
Crooked Creek impact crater, Missouri, extreme rapidity of folding and faulting 138
crossword clues, geological 48
cryptochrons/subchrons 91
Cuba, well prepared for Hurricane Michele 164
curling stones, only from Ailsa Craig 209
cyanobacteria, oxygen-generating 215
cyclocystoids, Lady Burn Starfish Beds *154*, 155
CZAJKOWSKI, M., A geological tour of the islands of Madeira and Porto Santo (Excursion guide 15) 26–34

danaite *see* Arsenopyrite (Minerals explained)
day-length, change over geological time 120
death assemblages 227
  Bowden shell bed 229–30
deep-sea muds 69–70
  effects of basalt–seawater reactions 69
  partial melting of subducted basalts 69–70
deformation features, collapse-induced, impact craters 138
deglaciation landslides 218
*Democrinus?* 109
*Dendrocrinus granditubus* 152
*Dendrocystoides scoticus* 156
*Dentalium* 230
Derbyshire Dome
  Ashbourne southwards basement concealed under Triassic rocks 94
  buried ridge of Widmerpool Formation (Snelston Ridge) 94, *94*
  geological setting of Ashbourne area 94
  South Pennine Orefield 94
Devon Great Consols mine, arsenopyrite in 73
diagenesis 226
  affecting hard skeletons of organisms 227–8
*Dictionary of Karst and Caves*, D. Lowe and T. Waltham, not just for cavers 123
*Dielasma hastatum* 141
dilatation joints 217
dinoflagellates, work on by William A.S. Sarjeant 210
dinosaurs
  in a Highland forest? 205
  largest found in Australia 3
  photographed pets? 7
  restoration of Crystal Palace dinosaur park 46, *46*
Dolní Vestonice, Tertiary fossil necklace 142
DONOVAN, S.K.
  A karst of thousands: Jamaica's limestone scenery 143–51, 174
  Arthropleurid myriapods (Fossils explained) 35–7
  LEWIS, D.N. and HARPER D.A.T., The Lady Burn Starfish Beds (Fossils explained) 151–7
  Taphonomy (Fossils explained) 226–31
Dorset and East Devon World Heritage Site/Coast 48
  removal of Scelidosaurus from the beach 203
Douglas, Rev. James
  Mantell's antiquarian mentor 225
  *Nenia Britannica* 225
drilling projects, Africa and Australia, analysis of early evolution of life 6
dry stone walling 54
  Blea Moor, facelift for 75
  roundabouts in Livingston New Town, West Lothian 133–4
    Compass 133, *133*
    Dyke Swarm 133, *134*
    Norgate 133, *133*
  Seaham Harbour, wall at Vane Tempest car park 134, *134*
Durham Cathedral, and the church of St Margaret of Antioch 163
dust, and mass extinctions, not proven 137–8
dust devils, on Mars 8–9, 9

Eagle Moor Sand and Gravel *18*, 19
  age of and deposition 21
  glaciofluvial remnants 20
the Earth
  'missing water' 176
  a new moon for (possibly asteroid J002E3) 204
    or perhaps a rocket case! 204
earthquakes
  beneath the English Channel, result awful for the French! 86
  Dudley earthquake, genuine tectonic event 202–3
  East Midlands (Melton Mowbray) 4
  locked-segment hypothesis 58
  showing strangelets 127
  very-long-period (VLP) and high-frequency (HF), Mammoth Mountain 213
Earth's core
  containing lighter element(s) 88–9
  incorporation of sulphur 88
Earth's crust
  formation of first continental crust 176–7
  found to be a vast reservoir of trapped hydrogen 127–8
East Gondwana, coming together of 135–6, *136*
  palaeomagnetism sorts the problem out 135–6
East Lothian, train delays due to subsiding mine workings 128
Eastern Pacific Hydrophone Array (PMEL), detecting underwater landslides 57
echinoids, Lady Burn Starfish Beds *154*, 155
*Ectinechinus lamonti* 154
Edeowie glass
  appears to be impact-related 89, *89*
  evidence for impact 89

Ediacara biota 151
edrioasteroids. Lady Burn Starfish Beds 155
education
  help for Earth-science teachers. INSET scheme launched by Natural History Museum 52
  the state we're in 120
Egypt. artificial pyramids maybe? 48
*Elrathia kingii* 142
*Emiliania huxleyi* 177
EMMERMANN. A.. For a piece of the moon 186–94
*Encope humala* (sand dollar). taphonomy and palaeoecology 228–9
  found in Coastal Group. Jamaica 228–9
  has features not seen in other *Encope* species 228. *229*
  holotype. taphonic history produced 'red herrings' 229
  study suggests correlation with Round Hill Beds 229
*Encrinaster grayae* 154
Endpiece 48. 87. 128
England. coprolite mining in 178–81
Environment Agency (EA)
  advice ignored. conversion of Slad Mills. Stroud 5
  Indicative Flood Plain Map showing areas at risk. challenged in the courts 126–7
  a 'managed retreat' policy? 4
environmental disasters. and organism death 226
*Eochonetes advena* 153
*Eocicerocrinus sevastopuloi* 152. 155
errata 86. 174
*Euomphalus pentangulatus* *141*
Europe. occurrences of turquoise 113
European Science Foundation. EuroCores scheme. two new programmes under 206–7
*Euzonosoma orbitoides* 154
Excursion guide (15) 26–34
exfoliation 217
  exfoliation domes. Yosemite Park 218. *218*
Exmoor. Brendon Hills. a forgotten slate industry 78–80
Exmoor National Park. part-time winter opening of some YHA hostels 125
Extraterrestrial watch 8–9

Falmouth Formation. Jamaica. collapse features 146. *146*
Farden Member. South Threave Formation 153
faustite (Turquoise Group) 111. 112
fertilizer. from coprolites 178–81
fiction. seismic and volcanic environments as backgrounds to 206
*Fingal's Cave*. for sale (the autograph score) 126
*Fingia prica* *141*
flood hazard. ignored by builders and councils 5
flood plains
  housing on
    and flooding 5
    still being built 203
  insurance refused for flood-prone properties 84–5. 203
flooding. goes to court 126–7
Floodplain gravel. Lincolnshire *18. 19.* 20. 21
floods vs. earthquakes in the ancient world 43
Fluorescent Mineral Society (FMS) *see* moon rock for sale
FORD. T.D.
  and bobkingite 199
  John Whitehurst (1713—1788): philosopher. geologist. horologist and engineer 100–7
  and KHAN. M.A.. on John H. McD. Whitaker 2–3
  and O'CONNOR. B.. Coprolite mining in England 178–81
  on *The Pennines and Adjacent Areas* 166–7
fossil communities. preservation of 227
  life assemblages and death assemblages 227
fossil hunters. YHA open some days November to March. Jurassic Coast 125
fossil record 107–8
  exceptional preservation in
    Konservat-Lagerstätten 151
    starfish beds 151–2
  Romer's Gap filled in 216
Fossil Record File (FRF). New Zealand 130
fossils
  are the oldest 'fossils' fossils? 175–6
    filaments in the hydrothermal site 175–6
    significant and opposing papers 174
    use of Raman spectroscopy 175. *175*
  as Neolithic funereal adornments. County Kerry. south-west Ireland 139–43
  new. and the FRF. New Zealand 130
    from ancient lake bed in Otago 130
  Red Hills Road cave. Jamaica 148
  significance of as funereal objects 142–3
    British Isles. earliest recorded occurrence 142
    legends and folklore about various fossils 142
    Megalithic tombs in Ireland 142–3
  Sole ownership 203
Fossils explained 35–7. 151–7. 226–31
fractures. and stress relief 217
France. lime quarries under German wartime control 206
FRANCIS. J.. review. *Fossil Woods and Other Geological Specimens* 234–5
freeze-thaw action 129
